

FenyaEDI for Retail

FenyaEDI is a modern Electronic Data Interchange platform built to connect suppliers, distributors, and major retail chains through a single, automated integration layer. It eliminates manual processing, reduces errors, and ensures fast, accurate data exchange between all parties involved.

Why Choose FenyaEDI?

- ✓ Faster order processing
- ✓ Reduced manual data capture
- ✓ Improved accuracy and compliance
- ✓ Seamless integration
- ✓ Scalable, cloud-based platform

SUPPORTED RETAILERS

We are continuously adding new retail partners

Direct ERP Integration

Customer orders are automatically received and processed in your ERP. Documents are generated and sent to retailers without manual intervention.

Pricing Validation

Ensure retailer pricing accuracy before orders are processed—reducing disputes and costly rework.

Automated Picking Slips

For businesses using third-party distributors, fenyaEDI automatically generates and sends picking slips in CSV or PDF format.

Store & Account Mapping

Map individual retail stores to specific customer accounts for accurate billing, reporting, and reconciliation.

Distributor Integration

Connect your distributors directly to the EDI platform, ensuring smooth order fulfilment and end-to-end visibility.

Electronic Statements & Invoicing

Generate electronic statements and automatically upload invoices once processed.
